The Annual Las Vegas Seminars will take place this year at Caesars Palace Hotel and will feature sessions on a wide range of topics. The seminars are designed for pediatricians, family physicians, and staff of non-pediatric physicians, nurses, nurse practitioners, and allied health professionals. Non-pediatric physicians may participate in all sessions.

**Target Audience**

This seminar is directed toward urban and rural, family practitioners and allied health professionals within the California Chapters of the American Academy of Pediatrics.

### Program Objectives

At the conclusion of this activity participants should be able to:

- Recognize the symptoms and signs of serious issues like pseudotumor cerebri, Hirschsprung's, and more.
- Utilize SMART therapy for patients with persistent nausea.
- Review current approved biologics, phenotyping, and biomarkers for treatment of specific allergic diseases.
- Identify common misconceptions related to allergic conditions.
- Understand the limitations of the use of elimination diets and food allergy testing for the diagnosis of food allergies.
- Accurately anticipate and care for complications associated with atopic dermatitis.
- Discover best practices to assess common presentations of warts, molluscum, and HSV infections and lesions.
- Explain the risk stratification of febrile infants.
- Discover the importance of lifestyle changes in managing patients with functional GI disorders.
- Find out the latest in the epidemiology, treatment, and demographics of children with functional GI disorders.
- Discover current best practices in the diagnosis and management of anaphylaxis.
- Discover current best practices in the diagnosis and management of asthma.
- Discover best practices in the diagnosis and management of patients with intermittent asthma.
- Review current approved biologics, phenotyping, and biomarkers for treatment of specific allergic diseases.
- Understand Red Book development processes including the role of the ACIP and AAP.
- Understand and utilize the myths surrounding temperature measurement.
- Be able to differentiate between infantileilets.
- Have knowledge about same common and not so common vaccine and infection related adverse experiences and outcomes.
- Identify common misconceptions related to allergic conditions.
- Understand the limitations of the use of elimination diets and food allergy testing for the diagnosis of food allergies.
- Discover best practices to assess common presentations of warts, molluscum, and HSV infections and lesions.
- Explain the risk stratification of febrile infants.
- Discover the importance of lifestyle changes in managing patients with functional GI disorders.
- Find out the latest in the epidemiology, treatment, and demographics of children with functional GI disorders.
- Discover current best practices in the diagnosis and management of anaphylaxis.
- Discover current best practices in the diagnosis and management of asthma.
- Discover best practices in the diagnosis and management of patients with intermittent asthma.
- Review current approved biologics, phenotyping, and biomarkers for treatment of specific allergic diseases.
- Understand Red Book development processes including the role of the ACIP and AAP.
- Understand and utilize the myths surrounding temperature measurement.
- Be able to differentiate between infantileilets.
- Have knowledge about same common and not so common vaccine and infection related adverse experiences and outcomes.
- Identify common misconceptions related to allergic conditions.

**PROGRAM**

**THURSDAY, DECEMBER 7, 2023**

**9:00 am – 10:00 am**
- **New Possibilities in Pediatric Infectious Diseases**: Carlo Di Lorenzo, MD

**10:15 am – 11:00 am**
- **Lung Health in Childhood**: Brad M. Kerner, MD

**11:15 am – 12:00 pm**
- **Multidisciplinary Approaches to Pulmonary Conditions**: David R. Stukus, MD

**12:15 pm – 1:00 pm**
- **Coffee Break – Visit the Exhibits**

**1:15 pm – 2:00 pm**
- **Pediatric Resident Paper Syllabus**: Brandi M. Kenner-Bell, MD

**2:15 pm – 3:00 pm**
- **The Eosinophils**: Zoey J. Goore, MD

**3:15 pm – 4:00 pm**
- **Surgery for Congenital Diaphragmatic Hernia**: Patricia E. Cantrell, MD

**4:15 pm – 5:00 pm**
- **The Perinatal Period**: Milton I. Arnold, MD, FAAP

**5:15 pm – 6:00 pm**
- **Adolescent Substance Use Disasters**: Eric H. Ball, MD

**6:15 pm – 7:00 pm**
- **Closing Remarks**

**FRIDAY, DECEMBER 8, 2023**

**7:30 am – 8:00 am**
- **Cafe for the Future**: Zoey J. Goore, MD

**8:15 am – 9:00 am**
- **Addressing the Overall Health of Our Pediatric Patients**: Brandi M. Kenner-Bell, MD

**9:15 am – 10:00 am**
- **GI Ulcers and Their Management**: David R. Stukus, MD

**10:15 am – 11:00 am**
- **Nutrition and Gastrointestinal (GI): Part 1**: Carlo Di Lorenzo, MD

**11:15 am – 12:00 pm**
- **Nutrition and Gastrointestinal (GI): Part 2**: David R. Stukus, MD

**12:45 pm – 1:30 pm**
- **Lunch and Networking**

**1:45 pm – 2:30 pm**
- **Maximizing the Impact of the Febrile Infant**: Timothy E. Wilens, MD

**2:45 pm – 3:30 pm**
- **Pharmacotherapy About PEM (Part 1)**: David R. Stukus, MD

**3:45 pm – 4:30 pm**
- **Pharmacotherapy About PEM (Part 2)**: David R. Stukus, MD

**4:45 pm – 5:30 pm**
- **Pharmacotherapy About PEM (Part 3)**: David R. Stukus, MD
